

# Sprint 3 Report

Repl.it

Rev 0: 11/18/24

## **Stop Doing:**

- Pushing testing till the end of the sprint

## **Start Doing:**

- Unit testing each feature/task

## **Keep Doing:**

- Ensure coding standards are in effect before pushing to github
- Scrum meetings right after class (everyone is available, early enough in day to get help for later)
- breakdown user stories ahead of time (results in less time spent editing mid-sprint, everyone understands what's going on)

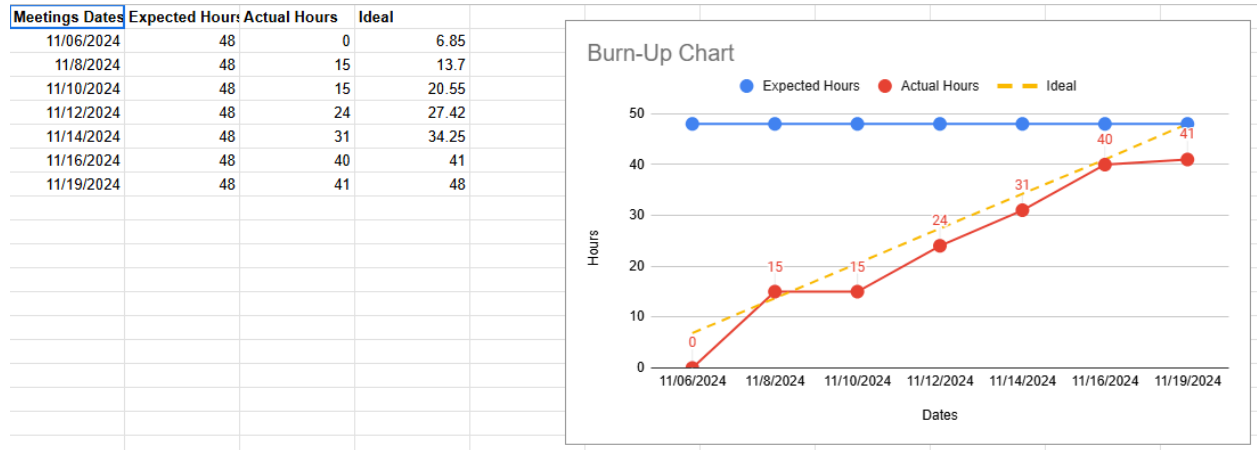

## **Work Completed:**

- As a new gym member, I should be able to see the machines in my current gym, so that I know which gym to visit
- As a local gym member, I should be able to add machine to a gym, so that it shows up next time I want to create a workout at this location
- As a consistent athlete, I should be able to set goals and see previous goals, so that I can plan out my progression

## **Work Incompleted:**

- As a consistent athlete, I should be able to see graphs with my weight/sets/bodyweight progressions, so that I can see if I'm on track for my goals (had trouble getting into graphable data, will be transferred into sprint 4)

## **Final Burnup Chart:**
