

# Sprint 1 Report

Repl

Rev 0: 10/22/24

## **Stop Doing:**

- Stop pushing incomplete versions (leads to others encountering errors when pulling for their work)

## **Start Doing:**

- testing at the time of creating (unit testing endpoints, ui components when they are made)
- breakdown user stories ahead of time (results in less time spent editing mid-sprint, everyone understands what's going on)
- making sure the documents are finished before TA meeting regardless of "due date"

## **Keep Doing:**

- Scrum meetings right after class (everyone is available, early enough in day to get help for later)

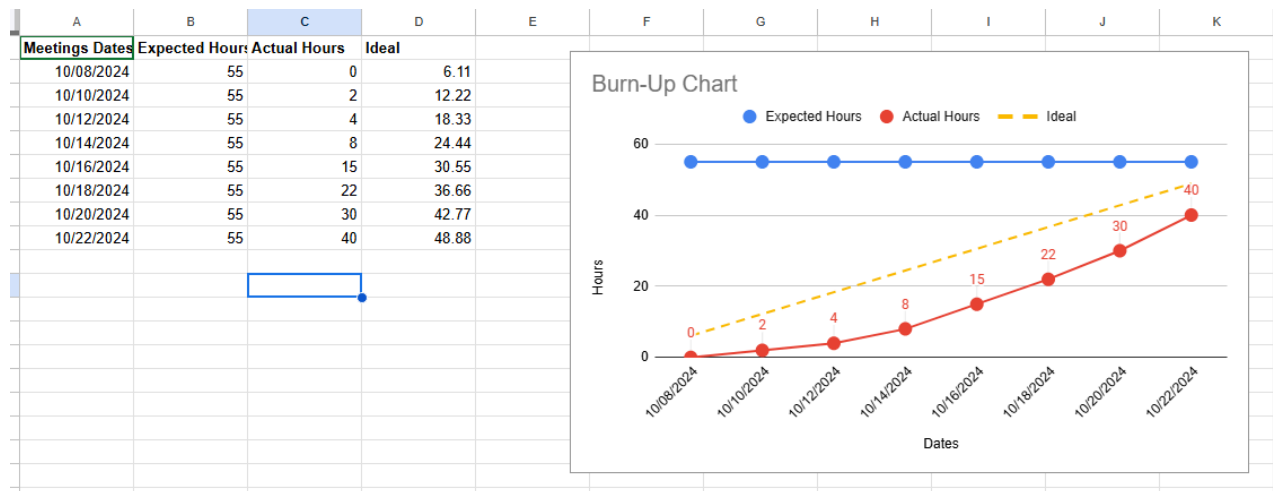

## **Work Completed:**

- As a user, I should be able to log in
- As a profile owner, I should be able to have my information stored in a database (Docker idea not needed, switched over to Neon)

## **Work Incompleted:**

- As a weekly workout enthusiast, I would like to be able to see workout history (unfinished testing)
- As a new gym-bro, I should be able to create/start workout (unfinished testing)
- As a daily workout enthusiast, I should be able to edit previous workouts (wasn't touched, moved to next sprint)

## **Final Burnup Chart:**
