Sprint 4 Report

RepIt

Rev 0: 11/30/24

Stop Doing:
- Solving Unit Test issues at the very end

Start Doing:
- n/a

Keep Doing:
- Ensure coding standards are in effect before pushing to github
- Breakdown user stories ahead of time (everyone understands what's going on)
- Unit testing each feature

Work Completed:
- As an athlete, I should be able to create/see previous lists of supplements + reminders, so that I don't forget anything
- Documentation
- Unit Testing

Work Incomplete:
- As a consistent athlete, I should be able to see graphs with my weight/sets/bodyweight progressions, so that I can see if I'm on track for my goals (unable to structure data correctly with graphs, dropped in order to focus more on documentation/testing/refining release)
